AWAIS ALI LASHARI

CYBERSECURITY / SOFTWARE DEVELOPMENT / APPLIED AI

Sukkur, Sindh, Pakistan | aliawais4413@gmail.com
github.com/awais-ali-dev | linkedin.com/in/awais-ali-lashari-/

PROFILE

Computer Science graduate with completed internships in cybersecurity, network management, and machine learning. Hands-on project work in endpoint monitoring, authorized web-security testing, cloud controls, authentication, and encrypted file sharing. Seeking an early-career role that combines careful implementation with clear technical documentation.

EXPERIENCE

Cyber Security Intern | Internee.pk | Remote | Aug-Oct 2026

Built and documented Wazuh monitoring, a local OWASP Juice Shop audit, and a non-production Azure security demonstration. Developed OAuth 2.0/TOTP and encrypted file-sharing prototypes; prepared incident-response and awareness materials.

Machine Learning Intern | Ezitech Software House | Remote | Jun-Aug 2026

Completed a two-month machine learning internship; role and completion supported by formal internship documentation.

Network Management Intern | Khairpur Defence City-2 | Jun-Jul 2026

Supported office network infrastructure, connectivity, and network operations for Project 2 during a full-time, paid internship.

SELECTED PROJECTS

Wazuh endpoint security lab. Configured file-integrity monitoring, failed-SSH-login detection, MITRE ATT&CK; mappings, and Postfix alerts in an Ubuntu virtual lab.

Secure file sharing and authentication. Built browser-side AES-256-GCM sharing with S3 signed URLs, and a Node.js/Express OAuth 2.0 and TOTP prototype.

Disaster SOS Pakistan. Solo-built a Kotlin/Jetpack Compose offline communication proof of concept using Nearby Connections; tested on two Android devices.

Medical imaging final-year project. Co-developed a ResNet-50/U-Net research prototype with Grad-CAM explanations, a Flask API, and a React interface in a team of three.

EDUCATION

BS Computer Science | Sukkur IBA University | 2022-2026 | Completed
CGPA: 3.05/4.00. Coursework includes information security, computer networks, software engineering, artificial intelligence, deep learning, and computer vision.

TECHNICAL TOOLKIT

Security & systems: Wazuh, OWASP ZAP, Linux, Azure IAM/RBAC, WAF labs, MITRE ATT&CK.
Development & data: Python, JavaScript, React, Node.js, Express, Kotlin, SQL, MongoDB, Git, Docker.
Applied AI: TensorFlow/Keras, OpenCV, computer vision, Grad-CAM, Flask.

CREDENTIALS & SERVICE

Completed: Google AI Professional Certificate, Google AI Essentials, Google Prompting Essentials; Cisco Introduction to Cybersecurity; selected Google/Microsoft security courses; MongoDB University and Kaggle Learn courses.
In progress: Google Cybersecurity (4/9 courses) and Microsoft Cybersecurity Analyst (3/9 courses).
TCF Alumni Ambassador, 2024-2025. Languages: Sindhi, Urdu, English.
